**FOR IMMEDIATE RELEASE**

**Zoro.com Consolidates Headquarters to Ogilvie Transportation Center**

New location will provide a central collaboration space while also attracting technology talent

**CHICAGO, November 14, 2022** - Zoro.com, an eCommerce company that sells millions of supplies, equipment, and tools to small businesses nationwide, today announced it will consolidate its headquarters to the 39th and 40th floors of the Ogilvie Transportation Center. The company will close its current spaces on Ogilvie's 16th floor and in Buffalo Grove, IL, but it plans to maintain its warehouse facility in Janesville, WI.

"Our new space will create an environment where our team members can build relationships, collaborate with their peers and develop a deeper understanding of what it means to be "customer-obsessed" at Zoro," said Kevin Weadick, President, Zoro. "Ogilvie's amenities and location will allow current team members to easily access our consolidated office, while helping us attract new talent, especially those looking to grow their technology careers. We are excited about this investment in our team members, and in the city of Chicago."

Zoro expects to move into the new space in late 2023.

Zoro launched in May 2011 with 20 team members and 180,000 items. Now, Zoro continues to expand and rapidly grow by offering 10 million unique products, with a goal to make it easy for every customer to get exactly what they need by shipping millions of products as fast and efficiently as possible.
