

From global knowledge and foresight to locally owned sustainable transformation

WHO WE ARE

INSPRO fosters the creation and construction of sustainable futures for territories and organizations in both public and private sectors. Our work is grounded in strategic foresight, multidimensional and transdisciplinary approaches, and the appropriation of knowledge by diverse stakeholders.

OUR APPROACH

Connecting theoretical foundations to local needs and global experience with co-creation of practical actions by local stakeholders.

WHAT WE DO

01

Strategic Foresight & Long-Term Planning

Planning processes for companies, municipalities, territories and Local Productive Arrangements (Clusters).

02

Action Learning & Capacity Building

Hands-on learning combining theory and practice through workshops, training and collaborative methodologies.

03

Innovation Ecosystems & Quadruple Helix

Connecting government, academia, business and civil society to foster applied innovation and collaborative solutions.

04

Territorial Development & Applied Research

Scientific and technological studies, strategic projects, policy support and governance for sustainable development.

SELECTED EXPERIENCE

Brazilian territorial foresight projects across different regions and productive ecosystems

- **Cristalina (GO)**
gems, jewelry, mineral crafts and tourism
- **Campos Verdes (GO)**
emerald legacy and territorial restructuring
- **Seridó & Vale do Açu (RN)**
mineral transition and regional articulation
- **Monte Santo (TO)**
remineralizers and emerging circular economy
- **Morro da Fumaça (SC)**
red ceramics and productive upgrading
