

Chat

Build Engaging Communities with Live Chat Functionality

Provide custom chat experiences your users need without worrying about scale, reliability, or security.

PubNub's Chat SDK is a set of tools for developers looking to integrate chat into their app or game. It allows you to create custom chat experiences quickly and easily without dealing with complex real-time infrastructure. With built-in features that integrate seamlessly with any UI, you can accelerate chat development while retaining control and flexibility.

Reliable Chat Backend

Our standard messaging features allow you to build direct, group, and large-scale chat a number of out-of-the-box chat features like read receipts, @mentions, presence, and unread message counts.

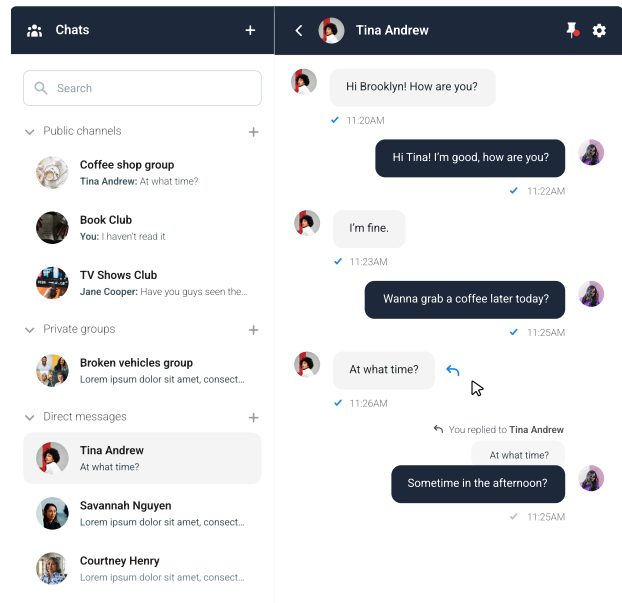

Moderation & Management

Moderate and easily manage your chat functionality through a no-code interface with BizOps Workspace.

Streamlined Development

Drive engagement, conversion, and retention with a full-featured chat experience built using pre-wired UI tools developed by UPDIVISION and Creative Tim and powered by PubNub. Focus on building your product while we manage the complex real-time infrastructure.

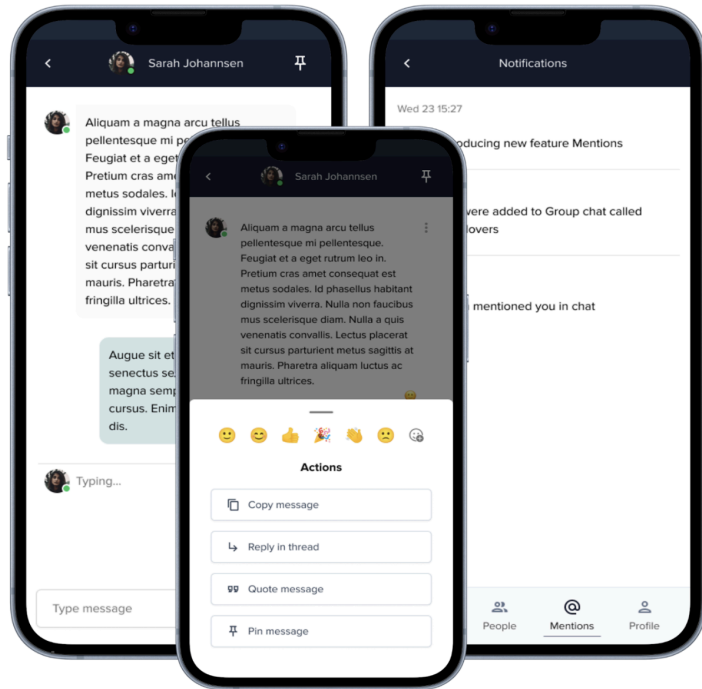

The chat we build in-house wasn't designed to scale for battles where many players need to send and receive messages simultaneously and in real time. Once we saw that we needed a scaled, real-time communication solution, we turned to PubNub."

Ashik Manandhar
Engineering Director, Pocket Gems

PubNub's pre-built chat features integrate seamlessly with any UI

- 1:1, group, & large-scale chat
- Message threads
- Send/receive messages
