

Industrial Threaded Products needed a compliant, mobile onboarding system.  
Thankfully they started **onboarding with WorkBright.**

## Case Study: Industrial Threaded Products

Industrial Threaded Products is a family-owned and operated manufacturing business based out of California. With three strategic locations and a single HR manager, ITP needed to find a solution that would help them onboard new employees easier while helping them stay compliant.

**"I would have a raft of emails and scans coming through from other branches."**

**-Vanessa Cockram, Human Resources Manager**

Before using WorkBright, Industrial Threaded Products had a largely paper-based onboarding process, even though they were using software for some of their onboarding needs. As an HR department of one, Vanessa was spending her time bouncing between locations and hoping that everything was getting scanned right when she was in a different city or taking a much-needed vacation.

**They needed a new system that was:**

**1**

**Set Up To Store  
State-Specific  
Documents**

**2**

**Easy For Workers  
To Use (Especially  
For I-9 Documents)**

**3**

**Created To Go  
Beyond Simple  
Document Signing**

see what happened on **page 2!**

# After Implementing WorkBright

## REDUCED

time spent  
onboarding to 3  
minutes per employee

## CREATED

a system with 95%  
use by previously  
onboarded employees

## UTILIZED

a compliant, digital  
onboarding program  
for employees.

The customer support assurance I got when I was first looking at WorkBright has actually carried on.

## How WorkBright Met Industrial Threaded Products Goals in the words of Vanessa Cockram

### STORING STATE-SPECIFIC DOCUMENTS

I was very paper-based using my past system. States want your onboarding system to be compliant, but my old system was generic. **WorkBright allows me to add the right state-specific paperwork.**

### EASY FOR EMPLOYEES TO USE (ESPECIALLY ON I-9S)

My old I-9 system was desktop use only. New employees would look at me strangely if I said, "Right, do you have a desktop?" **WorkBright I-9s can be completed via mobile.**

### CREATED TO GO BEYOND DOCUMENT SIGNING

WorkBright is five steps beyond a typical document signing company. I could upload documents, have forms made with my fields, send my forms, and **depend on support from a customer success manager to make it happen.**
