

Data security at Planday

No matter what your business does, Planday makes your day work. It's not only a smarter system for your staff management, communication and reporting, but a safe and secure solution you can rely on.

ISO 27001

Planday is proud to be ISO 27001 certified, making it one of the only platforms in the sector to meet the highest internationally recognised security standard. This means that as a Planday customer, you can trust your data is safe, and that constant attention is paid to improving systems and processes to protect your data.

ISO 27001 Certification
