

**TECH**  
CLEAN CALIFORNIA

## Brand Style Guide

v20210914

# Primary Logo

There are several lockups for versatility of use in a variety of applications. Choose an appropriate lockup based on format and the surrounding elements, maintaining a clear space around the logo (see next page), and ensuring that the logo is legible against its background.

## Primary Logo Lockups:

## Secondary Logo for Limited Applications

These logo lockups were created in anticipation of special use cases. Use these sparingly, and if in doubt, use a primary logo lockup instead.

### Secondary Logo Lockups:

## Primary Logo Clear Space and Size Requirements

### Clear Space Requirements:

Keep a clear space around the logo that is at least the width of the "H" in TECH.

### Minimum Size Requirements:

Whichever logo lockup you use, ensure it is legible at smaller sizes by keeping the "CLEAN CALIFORNIA" text at least 0.25" tall.

# Co-branding

Follow these guidelines to help illustrate the relationship between TECH and other entities. Confirm you have approval to use each entity's logo, and follow each brand's usage and clear space rules.

## Co-branding with TECH team members

Keep TECH logo separate from team member logo group:

## Co-branding with partner logo

When co-branding in a co-sponsorship or collaborative position, keep logos on the same line. Separate the logos with a 0.5 pt dark gray line if there are only two logos or two groups of logos.

# Language Guidelines

## **Names and Abbreviations**

Refer to the initiative as "TECH Clean California" when it first appears in any context. Subsequently, you may use "the initiative" or "TECH".

Do not capitalize "initiative". Do not abbreviate the initiative name to TCC.

"TECH" derives from the initiative solicitation and stands for Technology and Equipment for Clean Heating. It is not necessary to include this phrase in marketing communications, though it may be useful for more formal communications.

## **Funding Disclaimer**

On TECH marketing pieces that will be presented to the general public, trade allies, and potential partners, include the following funding disclaimer at no smaller than 7 pt font size:

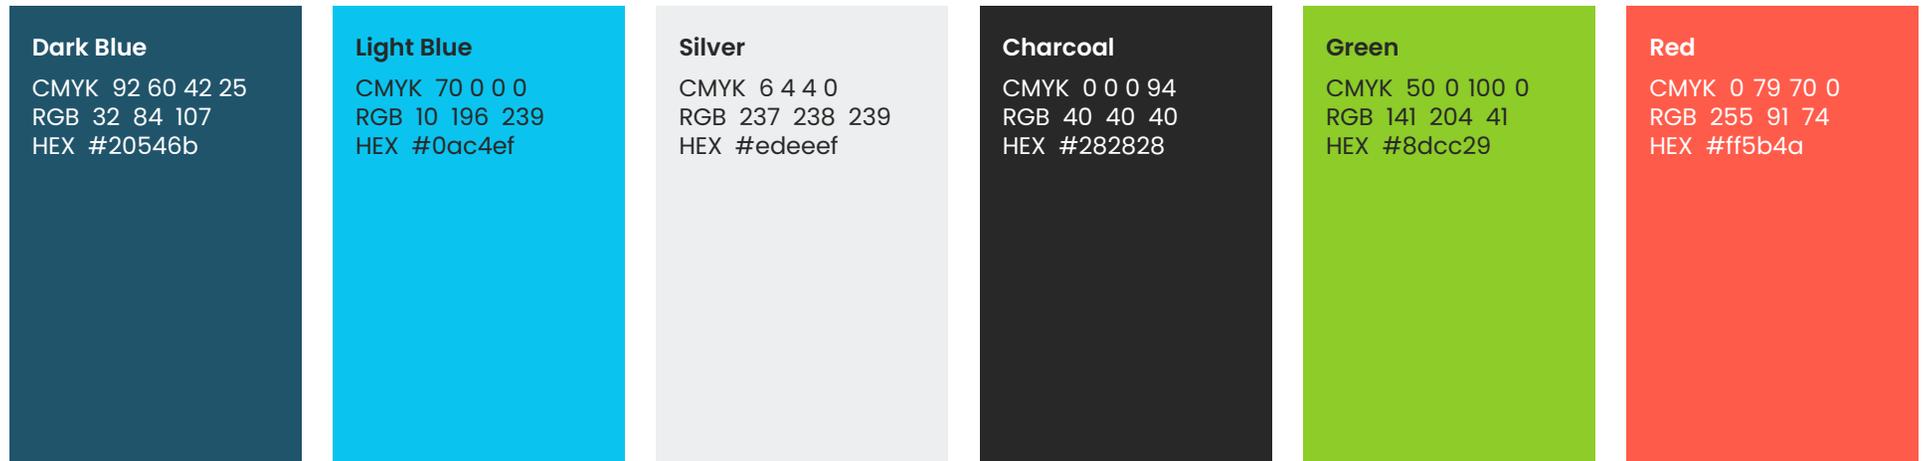

The TECH Clean California initiative is funded by California gas corporation ratepayers under the auspices of the California Public Utilities Commission.

# Color Palette

TECH's color palette is reflective of its mission and vision: the shades are primarily clean and pure (vs. muted or dusty) and convey a sense of optimism.

## Primary Palette:

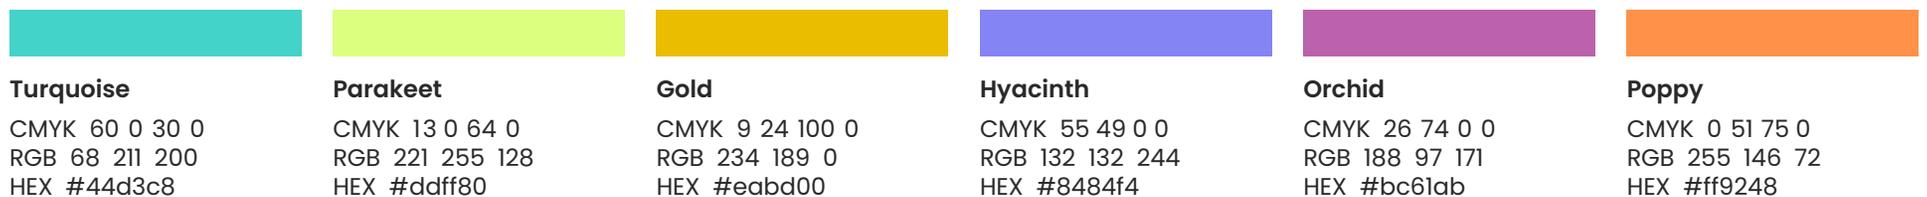

For use in most applications.

**Accent Colors:** Use to complement primary blues. Do not use alone together.

## Secondary Palette:

For use when additional colors are needed, such as in infographics and data charts.

# Typography

## Primary Typeface:

### Poppins

Poppins is a clean, geometric typeface with a wide range of weights. It is suitable for use in most print and digital applications. Poppins is available for free from Google Fonts.

## Secondary Typeface:

### Natom Pro

Like Poppins, Natom Pro is clean and minimal in design, but it has more humanistic elements, like angled strokes and feet, as well as unique stylistic alternates for some characters.

**NATOM PRO TITLE BOLD**  
**NATOM PRO TITLE BLACK**

A&A  
R&R

#### Alternative Typefaces:

When Poppins and Natom are unavailable, use Arial or Helvetica. Use Century Gothic sparingly as a geometric title or accent font (do not use in longform applications).

## Quick Start Grants

As part of the TECH Clean California initiative, Quick Start Grants (QSG) are available in the amounts of \$50,000–\$250,000 to fund localized, vanguard approaches to accelerate deployment of heat pump space and water heating technologies. Our goal is to test market transformation strategies and approaches, support technology development, and leverage high-impact opportunities to increase the installed base of heat pump technologies.
