## Meet the Crafty Lumberjacks

Andrew Boza and Dennis Setteducati

This duo went from center stage to craft studio, spreading holiday cheer with DIY hacks for every budget! Whether it's quick projects or budget-friendly decor, their feed is like a cozy winter evening: fun, festive, and full of surprises.

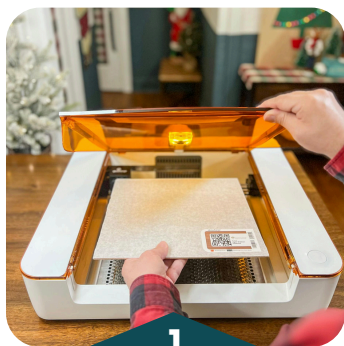

### Miniature A-Frame House

This is the perfect woodland accent for any season or holiday! This is a simple design that can be made with Glowforge Proofgrade Plywood. The best part is that you can make them in different sizes from tiny miniature ornaments to larger than life tabletop and mantle decorations. Use different accessories and paint colors to fit your aesthetic no matter the time of year!

Pop over to our [Instagram](https://www.instagram.com/thecraftylumberjacks) to see Dennis & Andrew make this festive A-Frame!

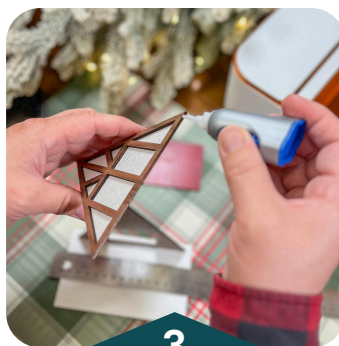

1

Place the Proofgrade Plywood into your Glowforge Aura and size the SVG file to your liking in the Glowforge App. Let your Glowforge do its magic and cut out the A-frame.

2

Paint the roof of the A-frame a pop of color and the base white. Trace the front of the A-frame onto a piece of parchment paper and cut it out. Glue the parchment paper to the windows of the A-frame to help with the holiday glow.

3

Glue the house together. Start with the front and the back of the house and then add the roofs. Tip: Use a quick drying precision point super glue to help hold everything together quickly.

4

This is the fun part! Gather up holiday miniatures and play around to see what fits best. Get creative and create your own little world. Place an LED candle or fairy lights through the back of the house and watch it glow!

## Get Cozy with Crafty Lumberjacks: Festive Vibes & Broadway Flair

### Crafting Setup

Lighting and music are essential! Bright lights keep the energy up, while festive tunes set the mood. Their cat Teddy keeps things lively, claiming a spot to “help” with extra materials.

### Entertainment

Holiday classics like Christmas Vacation, White Christmas, and even Gremlins are their must-watch movies.

### Craft Fuel

Popcorn and seltzer are their go-to snacks, but hosting calls for chocolate-covered espresso beans with peppermint for an energizing treat!

### Dream Projects

The dream? A new space with a dedicated craft room. They’d also love a session with the crafting queen herself, Martha Stewart.

### Cozy Scent & Decor

Holiday candles are a must for Christmas crafting. Think rich, seasonal scents for the ultimate festive vibe.

### Crafting Quirk

Andrew admits to overthinking projects, while Dennis is quick and decisive — together, they’re the perfect crafting balance!
