

Schneider Home

Integrated home energy management

Welcome to Schneider Home, home energy management made simple.

Winner of both the Omdia Innovation Award and CES Innovation Award (2023), Schneider Home makes it easy to lower your energy bills, stay powered during an outage and live more sustainably – all through one simple app.

Schneider Home Features

Schneider Home connects and manages your home's electricity, solar, back up battery, and EV charging all through one easy-to-use app. Making savings easy, it automatically uses the most cost-efficient source of energy and provides customizable one-touch, energy-saving settings to reduce your electricity usage. All of this comes in a sleek modern design that eliminates the clutter of conduit and boxes on the side of your home.

- **Schneider Pulse panel** is the heart of the electrified home, a smart electrical panel that connects all your home's energy sources.
- **Schneider Boost battery** stores solar energy during the day so you can use it during peak rates for utility bill savings and reliable power during an outage.
- **Schneider Inverter** is a high-power hybrid inverter for solar and storage that converts solar energy output into usable AC electricity.
- **Schneider Charge** can use your home's solar to charge sustainably and reduce charging costs.
- **Connected switches and outlets** provide convenient control and monitoring of your lights and appliances remotely.
- **Schneider Home app** controls it all, giving you the power to monitor, control, and automate your entire home's energy system all through one simple app.

Homeowner Benefits

Designed for all your home's energy needs, Schneider Home makes your house efficient, resilient, and sustainable — with minimal effort. Check out some of the benefits and features below:

- **Save money:** Optimize energy use with energy-saving settings and real-time monitoring to save you money while keeping you comfortable.
- **Power through outages:** Stay powered longer with fewer batteries by choosing where power goes during an outage.
- **Live sustainably:** Reduce your environmental impact by using less energy and shifting to the most sustainable energy source.
- **Enjoy simplicity:** Manage your home's energy use and smart home devices all in a single app.

Customized Solutions

Home energy management can be time-consuming, expensive, and stressful — but it doesn't have to be. With our online system design tool, simply enter a few details about your property and let Schneider take care of the rest. You'll get a recommendation on the spot, and we'll even connect you with a certified electrical installer to go over options and costs. No matter how big or small your home is, Schneider and our partners will work with you to develop a smart energy management system customized just for you.
