Tidel S3

Efficiency in Cash Management

Tidel S3

The Tidel S3 smart safe is ideally suited for low to moderate cash volume organizations that require a secure and auditable system to deposit their cash throughout their business day. The Tidel S3 provides increased security, greater accountability, and reduced risk for a store's cash environment. The Tidel S3 removes the manual burden of recording and reconciling cash deposits, allowing store personnel to focus on more productive tasks.

The Tidel S3 offers an expansive software suite that provides a complete cash management application with full accountability and auditability of all system activity. The Tidel S3 can easily connect to a store's network - via Ethernet or cellular – enabling full visibility to all system transactions from a remote location.

The integrated console, supported by a 7-inch color screen, is the focal point for all system transactions, all of which are completely auditable and traceable via individual user PIN.

Tidel S3 serviceability is extremely efficient and cost-effective. The main CPU board and power supply are easily accessible via the system console, making service calls faster, more secure, and less expensive.

The Tidel S3 note validator can be easily removed to clear a note jam, without the need for an expensive service call.

Benefits

Flexible

Configurable

Reduce costs

Store safely

Modular Sesami
Enterprise
Software

Sesami Enterprise Software Platform (SES)

Sesami Enterprise Software Platform (SES) for deposit devices with endless capabilities to embrace the future.

Hyperconnectivity

Connects with several cloud environments, including third-party systems, in real time with encrypted communication Protocol and open VPN by default. Connected, secure and efficient.

Omnipresent Access

Manage upgrades and users for any component of the device without physically needing to be on site, reducing unnecessary visits. Increase productivity by accessing real-time data, and predictive maintenance and performance analysis, giving you flexible and intelligent control of your cash deposit devices.

Endless Adaptability

Designed to be flexible and modular, the Sesami Enterprise Software Platform adapts rapidly and efficiently with robust, long-term reliability, to your operations and individual needs.

Designed on a building block architecture with multiple configurations proven in the field.

Flexible workflow

Allows for multiple business models and licensing options. Live custom fields and configurable workflows are just some of the features of the Sesami Enterprise Software Platform, which adapt to your business goals.

Advanced Reporting

Track everything with our live tailored reports, including advanced reconciliation reports for deposit collection and end of day and advanced cash monitoring. Designed to give you total control of your business.

Choose from the full range of software modules, including modules for your finances and for your service operations.
