Sallén D5

Bringing high speed and large capacity in one cash deposit unit.

Sallén D5

Maximum efficiency and reliability.

The D5 is part of the Sesami high-speed range. It has been designed to adapt to the pace of big companies and provide greater performance and flexibility in all cash deposit transactions. Today's economy has driven consumers to use less credit and more cash, growing the amount of paper transactions worldwide. Manually managing the flow of currency into business, represents a high cost-low return task, which also carries significant security risks. Automation offers significant potential for increasing productivity of the entire process.

The Sallén D5 will verify, count and store in a thermally sealed, single use plastic bag inside the safe every banknote deposited. Any tampering of the bag will be evident. All high speed series adapt to every company's needs in terms of size, capacity and type of storage.

Fast, efficient cash processing

- For businesses dealing with many customers, employees and suppliers every day, the D5 is your best option.
- The capacity and speed of the deposit unit allow you to streamline cash flow, cut on time-consuming operations and ensure a secure environment for your customers and employees.
- Stacked banknotes in bag in semi-stacker version.
- Multicurrency in the same transaction.
- Multilanguage.
- Sesami One Time Code system to open the safe.
- Visual and tactile interface via colour touch screen.
- Real time accountancy of each transaction.

Benefits

| Different identification formats | Hyper-connectivity | Reduce costs | Store safely | Endless Adaptability |

Sesami Enterprise Software Platform (SES)

Sesami Enterprise Software Platform (SES) for deposit devices with endless capabilities to embrace the future.

Hyperconnectivity
SES connects with several cloud environments, including third-party systems, in real time with encrypted communication Protocol and open VPN by default. Connected, secure and efficient.

Omnipresent Access
Manage upgrades and users for any component of the device without physically needing to be on site, reducing unnecessary visits. Increase productivity by accessing real-time data, and predictive maintenance and performance analysis, giving you flexible and intelligent control of your cash deposit devices.

Endless Adaptability
Designed to be flexible and modular, SES adapts rapidly and efficiently with robust, long-term reliability, to your operations and individual needs.

Designed on a building block architecture with multiple configurations proven in the field.

Flexible Workflow
Allows for multiple business models and licensing options. Live custom fields and configurable workflows are just some of the features of SES, which adapt to your business goals.

Advanced Reporting
Track everything with our live tailored reports, including advanced reconciliation reports for deposit collection and end of day and advanced cash monitoring. Designed to give you total control of your business.

Choose from the full range of SES Suite modules, including Balance for your finances and Enhance for your service operations.
