Tidel S4 Tube Vend

Tidel S4 Tube Vend

The Tidel S4 Tube Vend™ is a proven cash management system that helps retail organizations reduce the risk of internal theft, streamline in-store management time, and create greater efficiencies in store operations.

Ideally suited for the convenience store industry, the Tidel S4 Tube Vend is an effective solution to help manage the store's change fund.

The Tidel S4 Tube Vend offers 8 columns that can fit up to 11 tubes per column, and each tube can be fitted with either notes or coins. Once the tubes are loaded and recorded using the Tidel S4 console, the inventory is then automatically tracked and recorded as it is removed by authorized store personnel. The Tidel S4 end-of-day report will display the amount of cash removed by each employee, by user PIN, along

with the amount of cash deposited into the Tidel S4 note validators or into the manual drop slot. The sum of all transactions, by user PIN, will assist the manager in balancing each cashier against their cash sales recorded by the point-of-sale system. Tube inventory reports will indicate the needed funds required to load the Tidel S4 Tube Vend, which is typically a once per day function.

Each tube vending occurrence is enabled after an automatic time delay sequence is completed. This time delay serves as an effective deterrent to armed robbery. An "Buy Change" function requires a cashier to purchase their tubes of change by depositing the same amount of currency through the note validators, thus limiting the loan amounts to each cashier.

Benefits

Flexible

Configurable

Reduce costs

Store safely

Modular Sesami
Enterprise
Software

Sesami Enterprise Software Platform (SES)

Sesami Enterprise Software Platform (SES) for deposit devices with endless capabilities to embrace the future.

Hyperconnectivity

Connects with several cloud environments, including third-party systems, in real time with encrypted communication Protocol and open VPN by default. Connected, secure and efficient.

Omnipresent Access

Manage upgrades and users for any component of the device without physically needing to be on site, reducing unnecessary visits. Increase productivity by accessing real-time data, and predictive maintenance and performance analysis, giving you flexible and intelligent control of your cash deposit devices.

Endless Adaptability

Designed to be flexible and modular, the Sesami Enterprise Software Platform adapts rapidly and efficiently with robust, long-term reliability, to your operations and individual needs.

Designed on a building block architecture with multiple configurations proven in the field.

Flexible workflow

Allows for multiple business models and licensing options. Live custom fields and configurable workflows are just some of the features of the Sesami Enterprise Software Platform, which adapt to your business goals.

Advanced Reporting

Track everything with our live tailored reports, including advanced reconciliation reports for deposit collection and end of day and advanced cash monitoring. Designed to give you total control of your business.

Choose from the full range of software modules, including modules for your finances and for your service operations.

Hardware Features

- 7" Color console screen
 - Note validator maintenance door – enables validator heads to be removed in the event of a note jam
 - Two bottom vault options – storage vault (includes drop slot), or mailbox drop vault
 - Support for single or bulk note validators
 - Support for standard (1,200 notes) or XL (2,250 notes) Cassettes
- Support for detached Tube Vend module – connects to Series 4 via provided data cable
 - Integrated thermal printer with receipt cutter
 - Integrated tube loading gate that prevents unauthorized loading of tubes
 - Stores 11 tubes of 8 denominations for a total of 88 tubes
 - Each tube can hold up to 20 notes or a roll of coins

Software Features

- Integrated console to control all tube vend functions
- Personal Identification Number (PIN) and/or iButton allows managed access to functions, reports, and instant access
- Tubes can be vended by authorized personnel
- Tube vending limits can be placed on any cashier or manager
- Up to five adjustable time delays between each tube vend occurrence
- “Buy Change” allows for the exchange of a note for tubes of change
- All transactions, deposits, drops and vault access can be audited to an individual user through the use of PINs

Warranty

- 1 year parts and 90 days labor (inside the US)
- 1 year parts only (outside the US)

Power Requirements

- 120 VAC 60Hz or 220 VAC 50Hz
