Arca CM18b

Cash Recycler

Arca CM18b

Cash recycling and cash deposit in one device.

Powerful Combination

The Arca CM18b automates labour intensive cash handling processes and eliminates the need for dual control to free up valuable management time.

The Arca CM18b is also a deposit solution that automatically bags cash. The tamper evident bags are sealed securely inside the unit and ready for CIT pickup. No more cash strapping, giving staff even more time to serve customers.

It allows staff to recycle the cash needed for daily cash transactions as well as commercial change orders. It also reduces the time staff spends manually preparing cash for shipments and eliminates the need for dual control to free up valuable management time.

Features

The Arca CM18b offers the unique combination of recycling storage and dedicated bagging. In one section of the safe, notes designated for deposit are neatly stacked in a bag, physically separated from the recycling modules.

Never strap or face bills again. When cash is ready for bank deposit or CIT pickup, the bag is sealed inside the device before removal. So it automates deposit preparation and eliminates contact with deposit cash.

Automating traditional manual cash handling processes lowers labour costs while freeing employees to focus on customers.

Specifications

- Recycling capacity of \$85,000+ depending on configuration
- Deposit/dispense in batches of up to 200 notes without limits per transaction
- Full image sensors for visible, UV & IR light plus magnetic and ultra sound sensors
- RS232, USB 2.0 and TCP/IP connectivity
- Up to 6 recycling cassettes
- Mechanically sealing bag with a capacity of 3,000 banknotes
- Dimensions (h x w x d):
40.70 x 17.32 x 32.76 in
1,034 x 440 x 832 mm
- Weight: 992.08 lb / 450 kg
