TACC VI

TACC VI

The TACC VI is the latest addition to our world-renowned TACC product line. The TACC VI offers new features and functionality that enable retail organizations to effectively secure and manage their daily cash transactions.

The TACC VI offers several features that provide a flexible and convenient way for a store to manage its cash environment, including a single note validator, an integrated tube vend that holds up to 88 tubes of notes or coin, and an integrated console with a 7-inch color screen. Another key offering with the TACC VI, brand new to the TACC product line, is a note validator maintenance door. This innovative feature permits preauthorized store personnel to clear a note jam, without the need for a service call, greatly increasing system uptime.

The integrated console in the TACC VI enables a complete audit trail for all transactions, which are

tracked by individual user PIN. The touchscreen interface allows managers and cashiers to quickly record deposits and make change while keeping an accurate count on each day's transactions. Customizable reports allow for detailed tracking of cash amounts vended, manual drops, current content, and more.

The TACC VI is offered in two configurations. The mailbox drop vault configuration allows for the manual deposits of larger items such bags of coin, while the storage vault configuration allows for manual deposits of smaller items such as checks and envelopes.

The TACC VI will enable your business to realize improved cash security, streamlined reporting and substantial time saved during end of shift and end of day closeouts.

Benefits

Reliable   **User-friendly**   **Reduce costs**   **Store safely**   **Modular Sesami Enterprise Software**

Sesami Enterprise Software Platform (SES)

Sesami Enterprise Software Platform (SES) for deposit devices with endless capabilities to embrace the future.

Hyperconnectivity
Connects with several cloud environments, including third-party systems, in real time with encrypted communication Protocol and open VPN by default. Connected, secure and efficient.

Omnipresent Access
Manage upgrades and users for any component of the device without physically needing to be on site, reducing unnecessary visits. Increase productivity by accessing real-time data, and predictive maintenance and performance analysis, giving you flexible and intelligent control of your cash deposit devices.

Endless Adaptability
Designed to be flexible and modular, the Sesami Enterprise Software Platform adapts rapidly and efficiently with robust, long-term reliability, to your operations and individual needs.

Designed on a building block architecture with multiple configurations proven in the field.

Flexible workflow
Allows for multiple business models and licensing options. Live custom fields and configurable workflows are just some of the features of the Sesami Enterprise Software Platform, which adapt to your business goals.

Advanced Reporting
Track everything with our live tailored reports, including advanced reconciliation reports for deposit collection and end of day and advanced cash monitoring. Designed to give you total control of your business.

Choose from the full range of software modules, including modules for your finances and for your service operations.

Specifications

Weight & Dimensions

Weight:	316 lbs. (143 kg)
Height:	30.75" (781 mm)
Width:	22" (559 mm)
Depth: vault only	19" (483 mm)
Depth: overall	23" (584 mm)

Hardware Features

- 7" Color console screen
- Note validator maintenance door – enables validator heads to be removed in the event of a note jam
- Two bottom vault options – storage vault (includes drop slot), or mailbox drop vault
- One single note validator
- Support for standard (1,200 notes) cassette
- Integrated thermal printer with receipt cutter
- Integrated tube loading gate that prevents unauthorized loading of tubes
- Stores 11 tubes of 8 denominations for a total of 88 Tubes
- Each tube can hold up to 20 notes or a roll of coins
- RoHS Compliant/CE, UL Certified

Software Features

- Integrated console to control all deposit and cash vending functions
- Personal Identification Number (PIN) and/or iButton allows managed access to functions, reports, and instant access
