SafePay RC3000

Elevate your cash management with SafePay in a complete closed loop.

Enhance customer experiences with a range of cost-effective self-checkout solutions—from cashier-assisted options to fully automated cash touchless, and cashierless solutions.

Highly secure and efficient way to manage your cash in store

SafePay offers customers a quick and efficient way to pay with cash in any type of store. Cashiers are relieved of time-consuming back-office cash administration as cash is automatically checked and counted and cash totals are monitored online via our software.

From the moment your customers pay until cash is deposited into the bank, your earnings are kept safe and cash operations are optimised, since cash is never exposed or handled manually and no staff member has to be present during CIT pick up.

Daily earnings are transported securely into a sealed cassette from the check-out to the back office at the end of the day. Ink protection can be added into transportation sealed cassettes for extra security.

Transportation cassettes are slotted into the back-office deposit unit and automatically emptied.

Notes in back-office deposit unit can be stored into a thermally sealed plastic bag or into an armed CIT case.

No matter the space you have in the check-out, SafePay RC3000 will meet your needs. With our standard or Tall Edition you will have the thinnest front-end recycling system of the market.

Your staff will be happy to leave on time and you will be content knowing that everything is running as it should be as all process are also controlled by the highly technologically advanced software.

Benefits at a glance

Closed and controlled Cash Handling at checkout

Extensive in-store security in front and back office

Pre-Crediting integration

Simple staff maintenance

Designed for self-service or cashier operation

Sesami Enterprise Software Platform (SES)

Sesami Enterprise Software Platform (SES) for deposit devices with endless capabilities to embrace the future.

Hyperconnectivity
SES connects with several cloud environments, including third-party systems, in real time with encrypted communication Protocol and open VPN by default. Connected, secure and efficient.

Omnipresent Access
Manage upgrades and users for any component of the device without physically needing to be on site, reducing unnecessary visits. Increase productivity by accessing real-time data, and predictive maintenance and performance analysis, giving you flexible and intelligent control of your cash deposit devices.

Endless Adaptability
Designed to be flexible and modular, SES adapts rapidly and efficiently with robust, long-term reliability, to your operations and individual needs.

Designed on a building block architecture with multiple configurations proven in the field.

Flexible Workflow
Allows for multiple business models and licensing options. Live custom fields and configurable workflows are just some of the features of SES, which adapt to your business goals.

Advanced Reporting
Track everything with our live tailored reports, including advanced reconciliation reports for deposit collection and end of day and advanced cash monitoring. Designed to give you total control of your business.

Choose from the full range of SES Suite modules, including Balance for your finances and Enhance for your service operations.

Product Features

Multiple Configurations for Notes and Coins in a completely closed cash handling loop

About Closed Cash Management

SafePay is part of the SafePay closed cash management solution for retailers. Closed cash handling protects cash from the moment a customer pays all the way to the cash-counting center – no gaps in security and no weak links in the chain.

It replaces manual tills with a much more secure system which recycles cash and removes cash differences. Sesami is a pioneer in this field and has worked closely together with leading European retailers to develop SafePay – a reliable, secure and efficient closed cash handling system.

SafePay RC3000

Future-ready retail experiences

The SafePay RC3000 is an intelligent, adaptive, and secure point-of-sale checkout solution. It easily integrates into YOUR store environment and scales to YOUR business needs. Sesami's powerful enterprise software unlocks the AI-driven cash management capabilities by providing real-time insights and data analytics, enhancing decision-making and financial control. Elevate your cash management with the latest in Retail cash recycler innovation for unrivaled ROI.

Custom Solutions - Built to fit your cash ecosystem

No two businesses are exactly alike. That's why our platform was created to be flexible and modular so we can build the right solution that perfectly fits your footprint today, and can adapt to your evolving needs tomorrow—all while delivering significant cost savings that boost your bottom line.

Find the right solution for you!

Cash Monitoring Software
Complete control over your cash handling operations with business analytics, service monitoring, end-to-end cash reconciliation and multi-device connectivity.

Cash Deposit Solutions
Save time and money with smart cash deposit solutions for retail front and back office.

Cash Recycling Solutions
Optimise your cash flow and keep cash circulating efficiently with cash recycling solutions for retail.

SafePay Closed Cash Management
SafePay replaces traditional tills with a smart recycling system which protects cash from payment all the way to the cash-counting centre.

Bank Solutions
Cash automation solutions which support bank branch transformation and cut the time staff spend working with cash.

Service
Expert support ensures that your systems run smoothly and efficiently with minimal disruption to your business.

Sesami: A single, scalable, global platform offering intelligent and sustainable cash management solutions. Sesami's AI-enabled enterprise software and intelligent devices empower the banking, retail, and service industries worldwide, transforming cash management and delivering exceptional ROI
