

# Soltellus™ 2501L

## A Multifaceted Approach to Emulsion Excellence

### Overview

Soltellus™ is an anionic, biodegradable, multifunctional polymer offering a unique blend of benefits suitable for an array of emulsion applications. Soltellus features moisturizing and lubricating properties, offering noticeable improvements over standard formulations and improving overall skin feel and hydration.

#### APPLICATIONS

- Creams
- Lotion
- Serum

#### CONSUMER BENEFITS

- Improves the feel of skin
- Reduces friction, allowing for smoother application
- Hydrates skin
- Biodegradable

#### FORMULA BENEFITS

- Water Soluble
- Biodegradable
- Sensory Enhancer
- Stabilizer
- Chelator

### Performance

#### CONSISTENT, EFFECTIVE FORMULATIONS

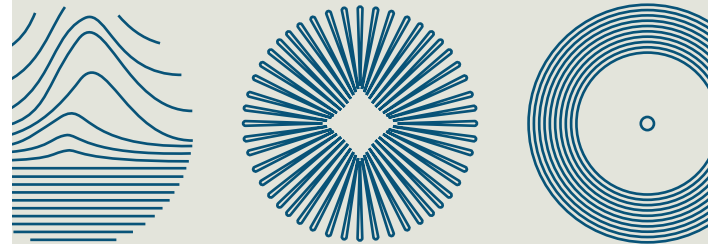

Soltellus helps ensure emulsion-based products remain uniform and effective over time, preventing the separation of oil and water components.

#### SUPERIOR SKINCARE INTEGRITY

Helping to stabilize emulsions, Soltellus is crucial for maintaining the quality and performance of skincare and beauty products over time.

## Features Moisturizing and Lubricating Properties, Improving Overall Skin Feel and Hydration

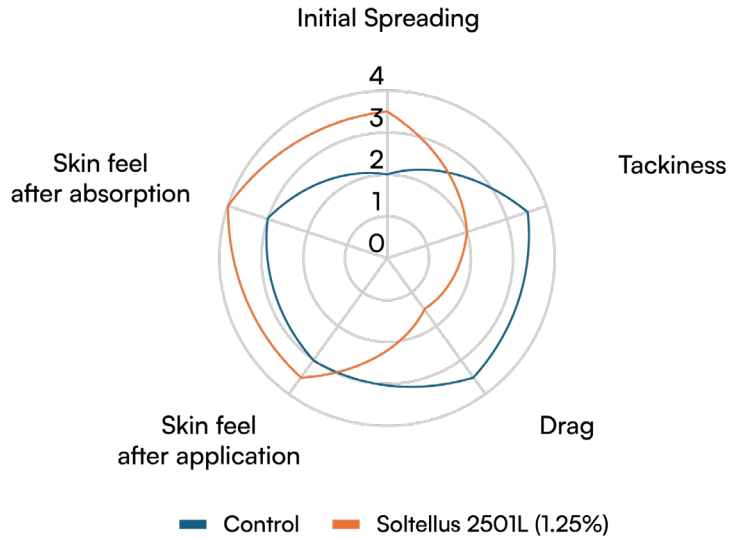

#### ENHANCED SKIN HYDRATION

Acting as a humectant, Soltellus boosts skin moisture and locks it in with a breathable film for enduring softness.

#### LUXURIOUS APPLICATION EXPERIENCE

Soltellus reduces tackiness and improves spreadability for a smooth, luxurious application and after-feel, leaving skin silky and non-greasy.

## Sensory Comparison of Emulsion Containing Soltellus 2501L vs Control

A simple emulsion formulation containing 1.25% Soltellus 2501L was evaluated for its sensorial profile in comparison to the control emulsion formulation. An expert panel conducted an evaluation, and the responses were tabulated and compiled in the spider chart.

### Available in

Soltellus™ 2501L	Sodium polyaspartate	Low Color Liquid (35% actives)
