+1 (510) 356-0555

Soltellus™ is an innovative, biodegradable polymer designed to enhance soil health, water quality and crop performance. As a multifunctional, water-soluble chelating agent, Soltellus™ improves nutrient retention, increases NPK cycling and fosters a thriving soil microbiome. Soltellus™ is a practical and sustainable solution for improving soil health and crop yields. Here are some data highlights from Soltellus™ trials during the 2024 crop year.
