

Two-Tone Game Night Dominoes Instructions

Duration: ~47m — Assembling: ~30m — Lasering: 17m

Things You'll Need:

- No supplies needed
- No tools needed

1 Choose your material and print.

Combine any stiff material with veneer to make these simple dominoes oh-so fancy. Choose medium material for a travel-weight set of dominoes or thick material for something closer to standard thickness.

2 Stick veneer to domino bases.

Just remove the adhesive backing from each veneer piece and stick it to a corresponding wood or acrylic piece. Make sure you align the edges so your dominoes stack up nicely.
