

## Spin 'N' Spill Balancing Snowman Game

Duration: ~27m

— Assembling: ~10m

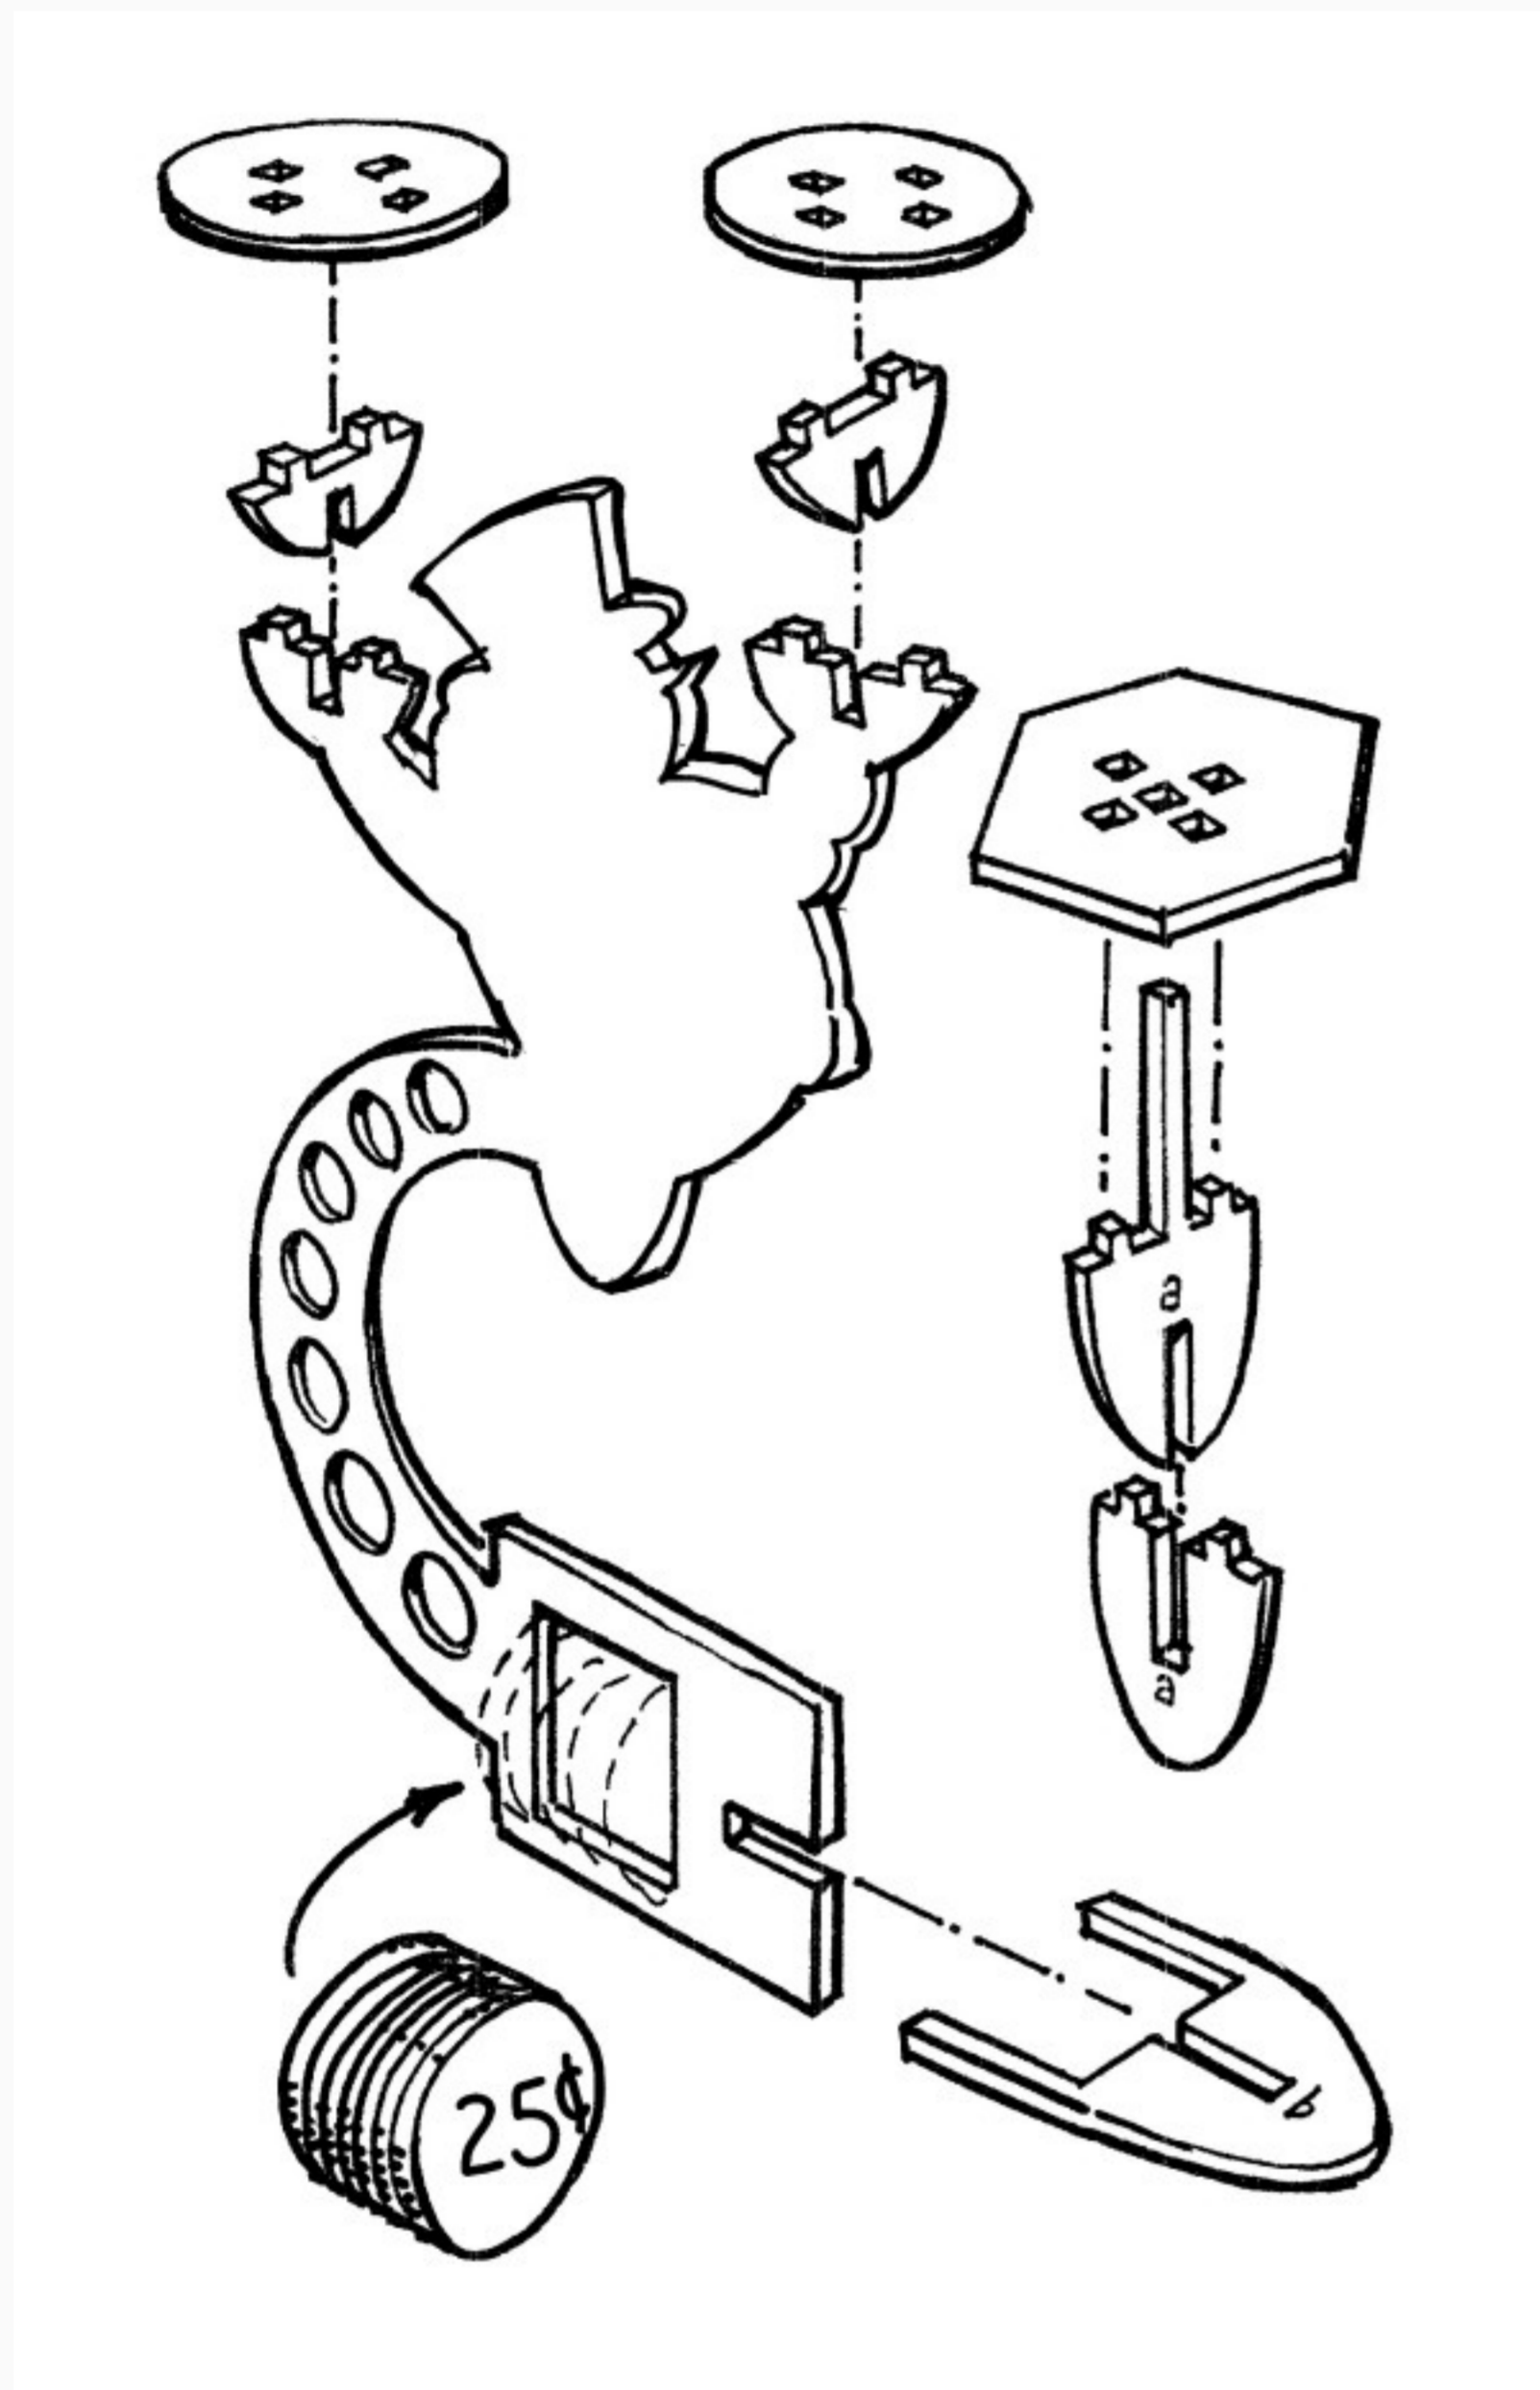

— Lasering: 17m

### Things You'll Need:

- Glue
- Quarters

- No tools required

### 1 Assembly

All parts will be assembled as shown above. A little glue may be needed to hold parts together. Up to 10 coins may be used.

### 2 Play

Any number of people can play. On your turn, spin the randomizer and add the number of snowballs or snowflakes shown to the bobbing, balancing snowman—but be careful! The stacks of slippery snowballs and snowflakes pile up higher and higher. If you cause anything to fall, you're out! Set up and the remaining players start again. The last remaining player is the winner. If you are lucky and nimble enough to successfully add the last of all the balls and flakes onto the swinging snowman without spilling anything, you're the instant winner! Tip: For a harder game, remove some of the coins to make a tipper snowman.
