# Service & Experience

We believe in always putting the customer's needs first. It's a principle many companies aspire to but at Taymor it's ingrained deep in our DNA. For 75 years we've been building meaningful and trusted relationships with builders and their teams so we can support their ongoing success.

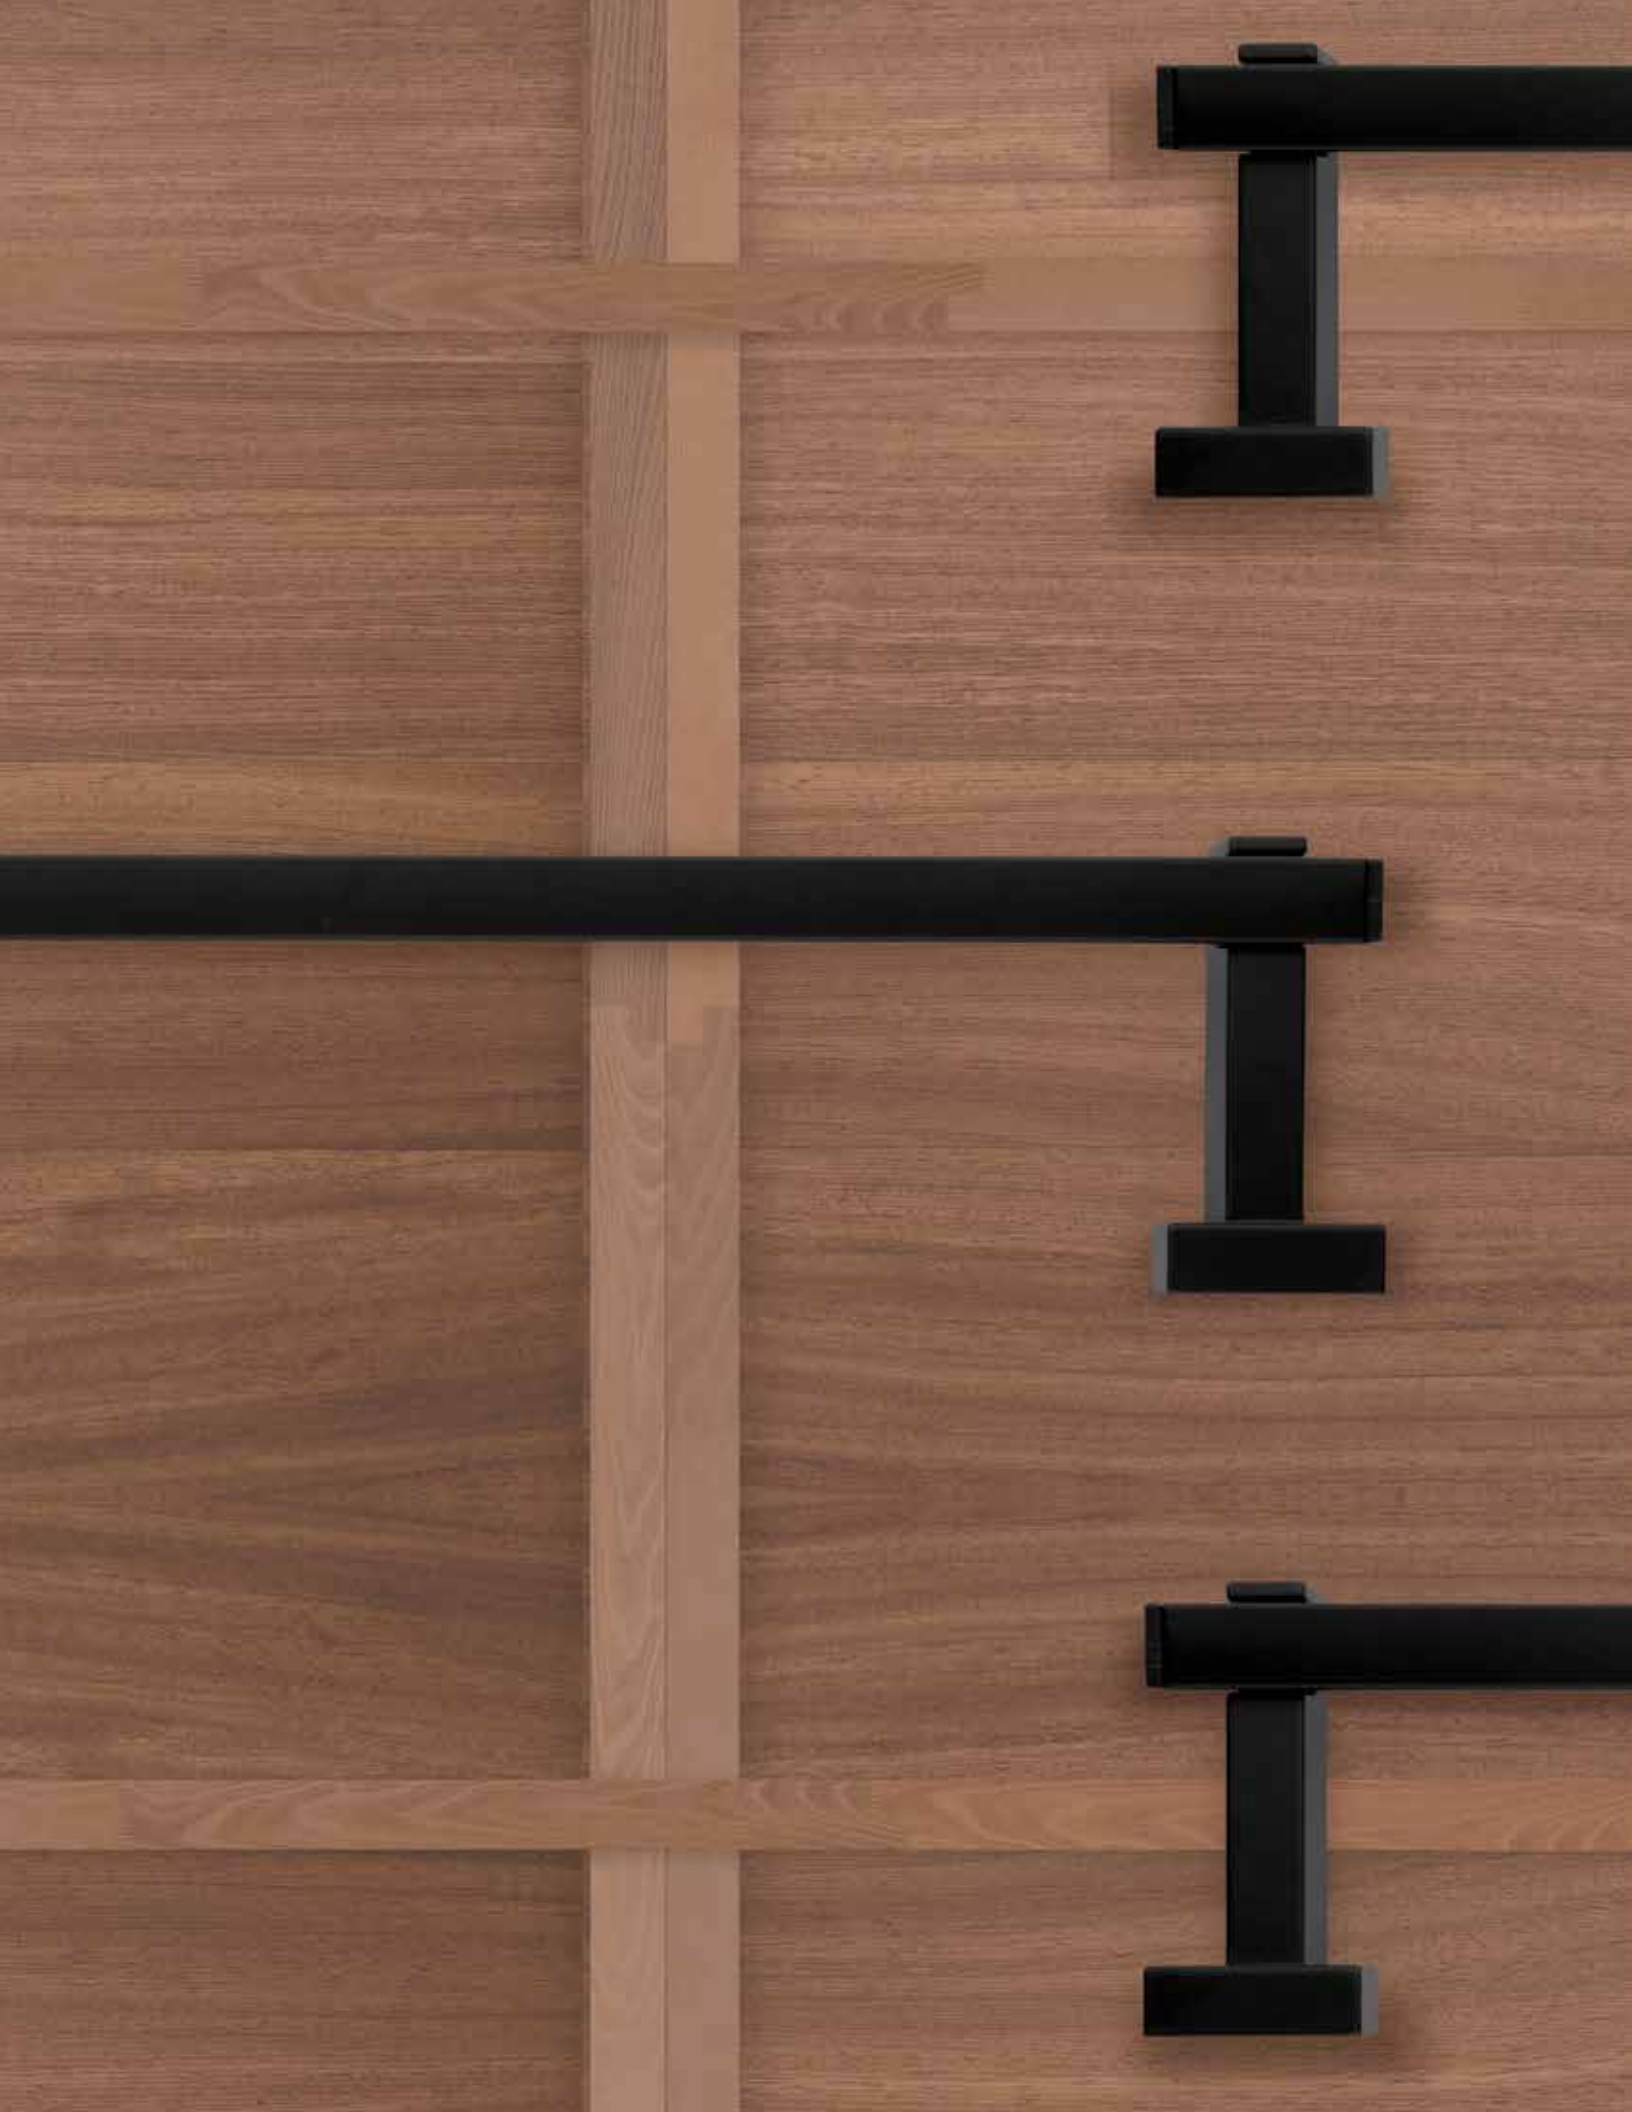

*Timeless Design*

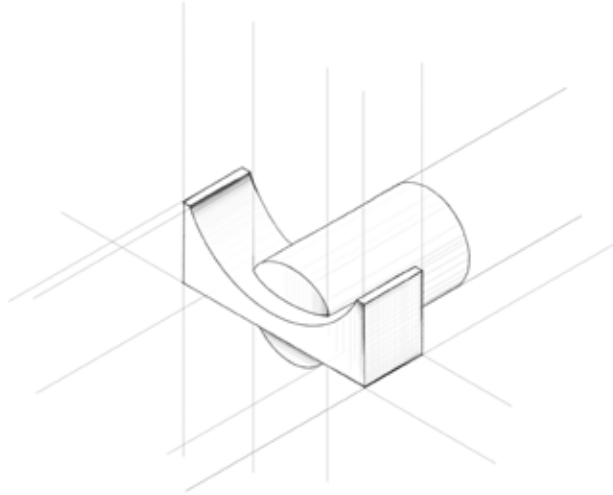

The background is a warm-toned wooden wall with a post-and-beam architectural style. A vertical wooden post runs down the center, intersected by horizontal wooden beams. Three black metal brackets are mounted on the wall, each consisting of a horizontal bar and a vertical stem with a base. The brackets are positioned on the left side of the wall, with one at the top, one in the middle, and one at the bottom.

# Keying Options

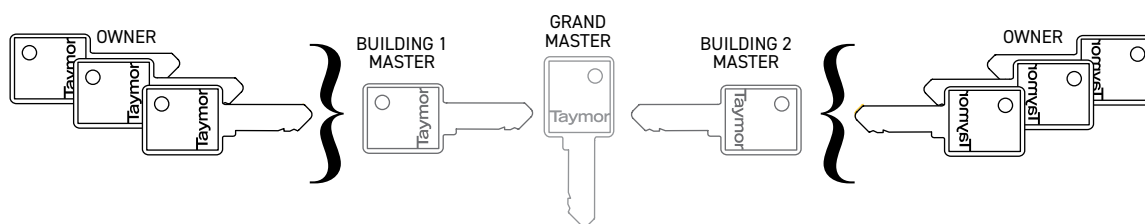

**KEYED ALIKE (KA)** systems are a perfect solution for single-family homes where homeowners may want one key to open multiple locks; for example, the front entrance and the back door.

**KEYED DIFFERENT (KD)** systems are common in multi-family buildings where each unit opens with a unique key.

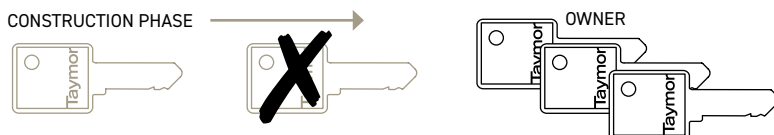

**MASTER KEYING (MK)** systems are common in multi-family, commercial and institutional buildings where multiple levels of building access are required. Individual units each have a unique key and the master key permits access to all units for maintenance, and management staff as well as first responders.

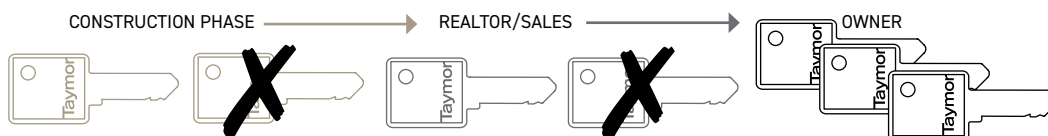

**GRAND MASTER KEYING (GMK)** allows the owner or strata responsible for multiple buildings to have one grand master key that operates all locks. Individual units have a unique key while each building has a master key that permits access to all areas—or to targeted areas—for tenants, maintenance, and management staff as well as first responders.

**CONSTRUCTION KEYING (CK)** allows the contractor of a project full access during the construction period. Once the owner's key is inserted, operation by the initial construction key is permanently disabled.

**DOUBLE KNOCKOUT CONSTRUCTION KEYING (CKRK)** adds a realtor key between the construction key and the owner key, which essentially allows a real estate professional to get temporary access until final handover to the buyer occurs. Once the owner's key is inserted, operation by the realtor key is permanently disabled.

From cylindrical locks and deadbolts to door closers and exit hardware; our commercial program has everything necessary to keep your entryways fully functional and up to code.

DUKE LOCKSET | SATIN CHROME

## MAKING THE GRADE

Real world quality — Taymor continuously works to meet and exceed standards set by the Builders Hardware Manufacturers Association (BHMA) and the American National Standards Institute (ANSI) for builder's hardware. The standards are defined by grades in which there are progressive levels of performance benchmarks. The purpose of standardized ANSI/BHMA product grades is to help identify the quality and durability of door hardware through a series of operational and security tests.

ANSI GRADE 1

ANSI GRADE 2

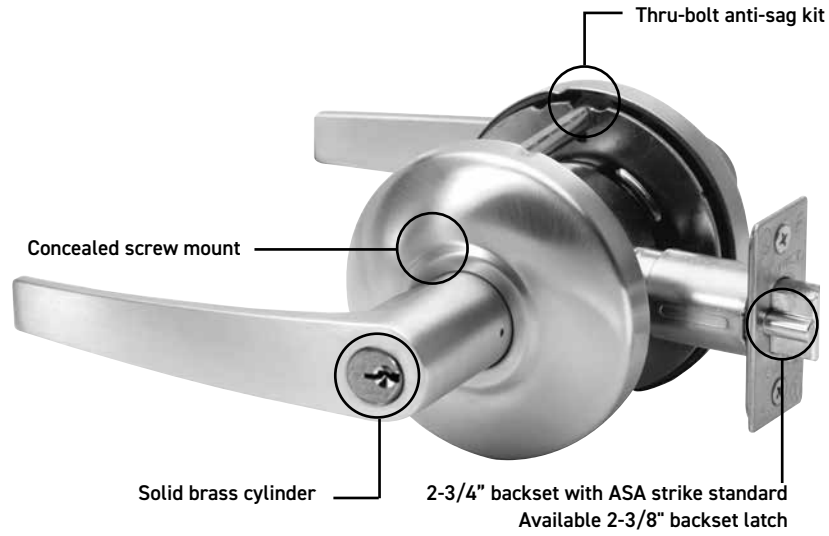

ANSI GRADE 3

**Grade 1** is the strongest grade available for maximum duty commercial applications.

**Grade 2** is designed and built to offer excellent security and durability for heavy-duty commercial applications.

**Grade 3** offers reliable security for both residential and light-commercial projects.

# Keying Options

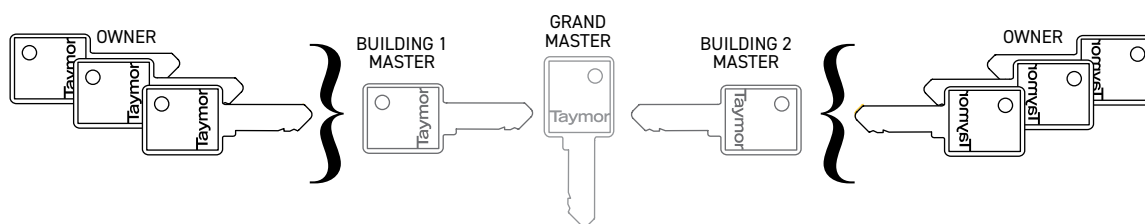

**KEYED ALIKE (KA)** systems are a perfect solution for single-family homes where homeowners may want one key to open multiple locks; for example, the front entrance and the back door.

**KEYED DIFFERENT (KD)** systems are common in multi-family buildings where each unit opens with a unique key.

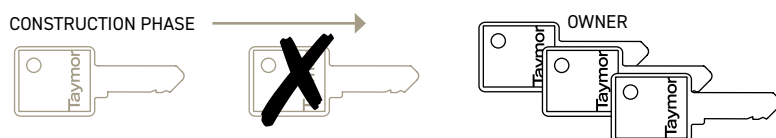

**MASTER KEYING (MK)** systems are common in multi-family, commercial and institutional buildings where multiple levels of building access are required. Individual units each have a unique key and the master key permits access to all units for maintenance, and management staff as well as first responders.

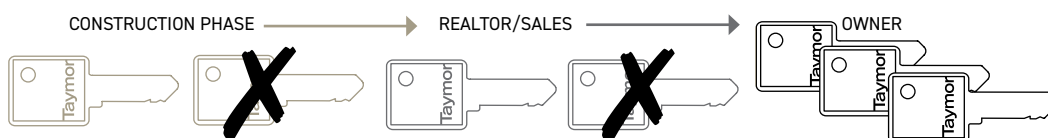

**GRAND MASTER KEYING (GMK)** allows the owner or strata responsible for multiple buildings to have one grand master key that operates all locks. Individual units have a unique key while each building has a master key that permits access to all areas—or to targeted areas—for tenants, maintenance, and management staff as well as first responders.

**CONSTRUCTION KEYING (CK)** allows the contractor of a project full access during the construction period. Once the owner's key is inserted, operation by the initial construction key is permanently disabled.

**DOUBLE KNOCKOUT CONSTRUCTION KEYING (CKRK)** adds a realtor key between the construction key and the owner key, which essentially allows a real estate professional to get temporary access until final handover to the buyer occurs. Once the owner's key is inserted, operation by the realtor key is permanently disabled.

## CARE & CLEANING TIPS

Taymor uses advanced technology to create a finish highly resistant to the effects of weather and normal wear and tear. Over time, frequency of use will cause some finishes to gracefully age in appearance. Additionally, exposure to atmospheric conditions and elements such as cleaning chemicals may cause some changes to occur. These finish changes are not considered manufacturing defects and are not covered by warranty. Rather, they are indicative of normal wear and tear. As always, following the manufacturer's care instructions will safeguard the longevity of your cherished Taymor product.

**DO:** Clean the product with mild soap and warm water. For best results, dry immediately with a soft, clean cloth.

**DON'T:** Do not use abrasive sponges or scouring agents for cleaning. We also advise against the use of solvents or acidic cleaners, lime scale removers, household vinegar and cleaning agents containing acetic acid.
