The Roosevelts AN INTIMATE HISTORY

THUR Aug 7 | 9 PM

The Fire of Life: Theodore Roosevelt leads a Progressive crusade that splits his own party, campaigns for American entry into World War I — and pays a terrible personal price. Franklin masters wartime Washington as Assistant Secretary of the Navy, while Eleanor finds personal salvation in war work. Her discovery of Franklin's romance with another woman transforms their marriage into a largely political partnership.

The Roosevelts AN INTIMATE HISTORY

THUR Aug 28 | 8 PM

The Storm: Franklin Roosevelt runs for vice president in 1920 and seems assured of a still brighter future until polio devastates him. He spends seven years struggling without success to walk again, while Eleanor builds her own personal and political life. FDR returns to politics in 1928 and acts with such vigor during the first years of the Great Depression that the Democrats nominate him for president.

The National Parks AMERICA'S BEST IDEA

WED Aug 13 | 8:30 PM

In 1851, word spreads across the country of a beautiful area of California's Yosemite Valley, attracting visitors who wish to exploit the land's scenery for commercial gain and those who wish to keep it pristine. Among the latter is a Scottish-born wanderer named John Muir, for whom protecting the land becomes a spiritual calling.

CLEARING THE AIR: THE WAR ON SMOG

TUE Aug 26 | 8 PM

In the summer of 1943, a thick noxious haze of smog enveloped the Los Angeles region. Residents complained of burning eyes and lungs, and some experienced nausea. The physical distress caused by the haze was so bad that many feared it was a Japanese chemical warfare attack. Over the next several years, the problem reached crisis proportions. Farmers began complaining of discolored lettuce, wilted crops, and dying produce. Many suspected emissions from sulfur-emitting factories had caused the foul air, but a chemist at the California Institute of Technology had a different theory. Arie Haagen-Smit determined that the smog was the result of sunlight breaking down incompletely burned gasoline and other hydrocarbons found in car emissions. Meanwhile, across the country, toxicologist Mary Amdur made a disturbing discovery: the combined effects of air pollutants, even when not lethal, she determined, could cause permanent damage to lungs. Both Haagen-Smit and Amdur would suffer reprisals from entrenched industries threatened by their discoveries, but as the 1950s progressed, ordinary citizens became active in the fight to address air pollution across the country until, in 1963, President Lyndon B. Johnson signed into law the Clean Air Act, one of the nation's first environmental laws. *War on Smog* will tell the story of the epic struggle against airborne toxins that lead to a national reckoning about air quality and the creation of the Clean Air Act.
