

product type designation

Connection block for RF18xC, M12, 7/8" 5-pin

-- spare part -- RFID PROFINET/Ethernet connection block, M12, 7/8 5-pole for RF180C, RF182C.

suitability for operation

Connection block for RF180C, RF182C, RFID 181EIP

transfer rate

transfer rate / for Industrial Ethernet 10 ... 100 Mbit/s

interfaces

type of electrical connection

- of Industrial Ethernet interface M12, d-coded
- for supply voltage 7/8" 5-pin

mechanical data

material Die-cast zinc

color silver

tightening torque / of the screw for securing the equipment / maximum 1.3 N·m

supply voltage, current consumption, power loss

supply voltage / at DC

- rated value 24 V
- 20 ... 30 V

continuous current / for loop-through to further bus nodes / at DC / maximum 8 A

ambient conditions

ambient temperature

- during operation 0 ... 60 °C
- during storage -40 ... +70 °C
- during transport -40 ... +70 °C

protection class IP IP67

shock resistance According to IEC 61131-2

shock acceleration 300 m/s²

vibrational acceleration 100 m/s²

design, dimensions and weights

width 60 mm

height 24 mm

depth 79 mm

net weight 0.23 kg

fastening method 4 screws included

product features, product functions, product components / general

display version 4 LEDs for Ethernet status

standards, specifications, approvals

certificate of suitability CE, FCC, cULus

MTBF 1100 a

security information

security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
